

In the interest of maintaining product pricing Millstone Mountain Farm does not sell beef in quantities less than a whole animal. Significant cost increases related to offering small quantities such as refrigeration & storage, higher processing costs and maintaining an inventory do not bring any more value to you, the consumer nor do they bring any more profit to us, the producer. Higher prices for you and higher costs for us would be the only significant result of offering small quantities for sale.

If you desire a quantity less than a whole animal we invite you to participate in our beef pool. This is an introductory program for 2009 in which we will pool multiple small orders together to make whole animal orders. This will allow us to maintain our pricing while offering the convenience of smaller orders. Please fill out the information below and email your order and any question.
